

Sale Name: 12/16/24 - Combined Estate & Consignment Auction

LOT 609 - Sterling Electric Ice Cream Freezer

Description

The Sterling Electric Ice Cream Freezer is a vintage appliance with a 5-quart capacity, indicated by its labeling. The freezer is made by Richmond Cedar Works, as marked on the unit. It features a wooden bucket with metal bands and includes metallic and wooden parts for operation. The electric motor, identified by catalog number 165A, operates on standard voltage and wattage, ensuring efficiency. This model offers a

nostalgic appeal and is ideal for collectors or those interested in retro kitchen devices. The condition appears to be used with visible wear, but retains its functional components including the pivotal mechanism for ice cream churning.
